

Energy performance certificate (EPC)

24 Mill Road PORTSTEWART BT55 7SW	Energy rating F	Valid until: 18 April 2033 <hr/> Certificate number: 9281-3026-7204-7617-0204
---	---------------------------	--

Property type
 Detached house

Total floor area
 86 square metres

Energy efficiency rating for this property

This property’s current energy rating is F. It has the potential to be D.

[See how to improve this property’s energy performance.](#)

Score	Energy rating	Current	Potential
92+	A		
81-91	B		
69-80	C		
55-68	D		60 D
39-54	E		
21-38	F	25 F	
1-20	G		

The graph shows this property’s current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in Northern Ireland:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 50 mm loft insulation	Poor
Roof	Roof room(s), no insulation (assumed)	Very poor
Window	Fully double glazed	Average
Main heating	Boiler and radiators, oil	Average
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Low energy lighting in 15% of fixed outlets	Poor
Floor	Suspended, no insulation (assumed)	N/A
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

Primary energy use

The primary energy use for this property per year is 443 kilowatt hours per square metre (kWh/m²).

▶ [What is primary energy use?](#)

Additional information

Additional information about this property:

- Cavity fill is recommended

Environmental impact of this property

This property's current environmental impact rating is F. It has the potential to be E.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year. CO₂ harms the environment.

An average household produces

6 tonnes of CO₂

This property produces

9.4 tonnes of CO₂

This property's potential production

4.8 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

Improve this property's energy rating

▶ [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm**Typical installation cost**

£100 - £350

Typical yearly saving

£78

Potential rating after completing step 1**26 | F****Step 2: Cavity wall insulation****Typical installation cost**

£500 - £1,500

Typical yearly saving

£234

Potential rating after completing steps 1 and 2**30 | F****Step 3: Hot water cylinder insulation**

Increase hot water cylinder insulation

Typical installation cost

£15 - £30

Typical yearly saving

£34

Potential rating after completing steps 1 to 3

31 | F

Step 4: Low energy lighting

Typical installation cost

£55

Typical yearly saving

£98

Potential rating after completing steps 1 to 4

32 | F

Step 5: Heating controls (room thermostat and TRVs)

Typical installation cost

£350 - £450

Typical yearly saving

£290

Potential rating after completing steps 1 to 5

37 | F

Step 6: Room-in-roof insulation

Typical installation cost

£1,500 - £2,700

Typical yearly saving

£767

Potential rating after completing steps 1 to 6

55 | D

Step 7: Floor insulation (suspended floor)

Typical installation cost

£800 - £1,200

Typical yearly saving

£164

Potential rating after completing steps 1 to 7

59 | D

Step 8: Heat recovery system for mixer showers

Typical installation cost

£585 - £725

Typical yearly saving

£38

Potential rating after completing steps 1 to 8

60 | D

Step 9: Floor insulation (solid floor)

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£51

Potential rating after completing steps 1 to 9

61 | D

Step 10: Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£172

Potential rating after completing steps 1 to 10

66 | D

Step 11: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£3,500 - £5,500

Typical yearly saving

£616

Potential rating after completing steps 1 to 11

76 | C

Paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

Estimated energy use and potential savings

Based on average energy costs when this EPC was created:

Estimated yearly energy cost for this property

£3475

Potential saving if you complete every step in order

£1705

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
