You could **save £115 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Impact on the environment

This property's current environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year. CO₂ harms the environment.

Carbon emissions

An average household produces	6 tonnes of CO₂
--------------------------------------	-----------------------------------

This property produces	5.3 tonnes of CO₂
-------------------------------	-------------------------------------

This property's potential production	4.9 tonnes of CO₂
